The **Class II Mobile** solution will bridge the gap between the casino floor and the digital world, delivering iconic games that players love anytime and anywhere on land which is legally approved for gaming. The product creates a seamless player journey with built-in loyalty, marketing, and integrations with existing land-based systems. These factors, combined with geo-fencing technology, ensure both security and compliance adherence. The product is also integrated with the Wide Area Ball Call to minimize wait times for players.

Additionally, the highly anticipated **Lightning Link** brand represents the next evolution of the Aristocrat Interactive roadmap. Developed by a world-class team to deliver engaging, high-performing content that fuels sustained growth, the addition of Lightning Link to the content portfolio demonstrates the company's ongoing commitment to bring market-leading land-based content into the online space.

Finally, **OASIS Home** will serve as a new landing page for all things OASIS, enterprise-wide, will be introduced at G2E. Through this new optimization, casino operators will now be empowered with a seamless, scalable, and secure centralized management platform that streamlines user access, enhances operational efficiency, and drives innovation.
